WORK EXPERIENCE

October 2024 - Present

Larose Noire Philippines, Inc.

Full Stack Developer Lead | Database Admin

- Leading the Innovation Team, mentoring junior developers, and managing sprints.
- Built and maintained internal enterprise systems using C#, AngularJS, .NET Core, and SQL Server.
- Integrated RESTful APIs and ensured secure handling of sensitive data.
- Performed database backups, optimization, and schema design.
- Deployed applications via IIS, ensuring scalability and stability.

March 2024 - August 2024

School DTR and Canteen System | Mabiga, Mabalacat

Full Stack Developer

- Developed the UI in Angular using TypeScript, ensuring type safety and clean architecture.
- Wrote reusable services and components to support the payroll engine logic.
- Employed C# for backend services and SQL Server for robust data management.

Sep 2023 - Feb 2024

Law Firm DTR & Payroll System | Capas, Tarlac

Full Stack Developer

- Developed a comprehensive DTR (Daily Time Record) and Payroll System from the ground up using C# for backend logic, SQL Server for database management, and AngularJS for the front-end interface.
- Deployed the application on IIS (Internet Information Services) for secure, scalable, and reliable hosting.
- Implemented secure and efficient payroll calculations, integrating employee time records with automated deductions.
- Provided thorough documentation and training materials for users and administrators to effectively use the system.
